TECHNICAL SKILLS

IOT
Arduino, sensors, C++

SIMULATION
Unity

FRONTEND
React.js, Vue.js, JavaScript, HTML, CSS

BACKEND
Node.js, Express.js, Elixir

DATABASES
MongoDB, PostgreSQL

DESIGN
Figma, UX/UI

SOFT SKILLS

Creativity · Teamwork · Communication · Problem solving · Project management

LANGUAGES

English – C1

French – B1

Gujarati – Native

Hindi – Native

ACTIVITIES

Event Manager – Squid Game
MU Fest, Marwadi University
2023 and 2024 editions

HOBBIES

Drawing & illustration · Sports (cricket, volleyball, badminton) · Photography · Swimming · Exploring historic places

ABOUT ME

Master's student at Epitech Paris, looking for an **alternance (4 weeks in company / 2 weeks at school)**, **available immediately**. I connect **hardware and software**: I have built an **Arduino sensor system** linked to a **Unity** simulation, taught **C++ for IoT**, and I develop **web applications** with React, Vue.js, Node.js and Elixir, the kind of interfaces used to monitor and control connected devices.

EDUCATION

MASTER'S IN INFORMATION TECHNOLOGY

Epitech (Paris, France) · 09/2025 – 05/2027

BACHELOR'S IN COMPUTER ENGINEERING

Marwadi University (Rajkot, India) · 06/2021 – 04/2025

WORK EXPERIENCE

ASSISTANT PROGRAMMING INSTRUCTOR

Master Koder (Morbi, India) · 11/2022 – 04/2023

- Mentored students in **C++ for IoT**, HTML, CSS and JavaScript.
- Designed and built basic **IoT and web projects** for teaching.
- Guided students through **hands-on projects** and real problem solving.

FREELANCE WEB DEVELOPER / UX/UI DESIGNER

Freelance (Morbi, India) · 03/2025 – 06/2025

- Website: **RoohPhotoFilms**
- Designed and built **responsive websites** with Figma, React and Tailwind CSS.

FRONTEND WEB DEVELOPER

Levaral Solutions (Rajkot, India) · 07/2024 – 10/2024

- Developed a **responsive dashboard** with React.js and Tailwind CSS.
- Created **reusable components** and **optimised frontend code**.

PROJECTS

PATH FINDER – SMART WASTE COLLECTION (IOT)

Arduino (C++), sensors, Unity · github.com/krishbavarva/Path_Finder

- Built an **Arduino circuit with 3 sensors**, one on each of 3 dustbins, to detect when a bin needs emptying.
- Connected the sensors to a **Unity app** with a road map of the bins.
- When a sensor triggers, a garbage truck in the Unity app **automatically drives to that bin**, collects the garbage and **returns to base**.
- Brought together **hardware, real-time signals and a 3D simulation** in one working system.
- **Team project**.
